

TOKISTAR LIGHTING INSTRUCTION MANUAL

LDR24-96 24 VDC/96 WATT LED DRIVER

General

Tokistar's LDR24-96 is a 96 Watt Class 2 LED Driver used to convert an AC input into a 24 VDC output. It may be operated from a wide range of input voltages.

Warning!

Do Not Connect Input Wires to Dimmer.
This Will Damage the Driver.

Input Connections

With power off, connect the AC input wires to the LED Driver using the proper UL approved wire nuts or other secure connection means. The **Brown** wire from the unit should connect to the incoming AC Line wire. The **Blue** wire from the unit should connect to the incoming **White** AC Neutral wire. The **Yellow/Green** wire from the unit should connect to the incoming AC Ground wire.

(Note: The complete metal case is referenced to AC ground upon proper installation of AC input wires.)

Check For Proper Output Voltage

Make sure secondary wires are not touching each other or conductive surface. Turn on the AC supply and test the output voltage to ensure it is 24 VDC. Turn off the AC Supply.

Output Connections

With power off, connect the LED Driver's DC output wires to the LED lighting fixture using the proper UL approved wire nuts or other secure connection means. The **Black** wire from the unit should connect to the lighting fixture's DC negative '-' input. The **Red** wire from the unit should connect to the lighting fixture's DC positive '+' input.

! PRECAUTIONS

1. Read all instructions completely before beginning installation.
2. Turn off electricity before beginning installation.
3. All wiring is to be performed by a qualified electrician.
4. Installation must comply with the National Electrical Code, and all applicable codes.
5. Turn main supply to LED Driver on only after all connections are made and tested.
6. Use only LED Drivers provided by Tokistar with the system.
